

AARYAN PULLAKUDI VEETIL

BTech - Computer Science Engineering (AI & ML)

aaryanharidas23@gmail.com | +91 6362891770 | linkedin.com/in/aaryanpullakudi/ | github.com/aaryanpv23

SUMMARY

Motivated Computer Science student specializing in AI & ML with strong foundations in Python, Java, and Data Structures. Passionate about building practical solutions and exploring AI-driven applications. Seeking internship opportunities to apply technical and problem-solving skills.

LEADERSHIP AND EXPERIENCE

Aaruush SRM, Event Coordinator

2023 – 2025
SRM Institute of Science and Technology

- Worked in the conduction team for E-Summit 9.0 of Aaruush SRM in 2025
- Handled cold calling, made 80+ cold calls to Internship, Educational and Career Guidance companies
- Managed data entries of 100+ companies with their Person of Contacts
- Extracted contacts and Email IDs via LinkedIn and extensions such as Contact Out
- Handled the Education Fair on ground and attracted students to attend

EDUCATION

BTech in Computer Science Engineering, SRM Institute of Science and Technology

2024 – 2028

Specialization: Artificial Intelligence and Machine Learning CGPA: 8.5

TECHNICAL SKILLS

Programming Languages

- Python
- Java
- MySQL

AI / ML

- Artificial Intelligence
- Machine Learning Concepts

CS Fundamentals

- Data Structures & Algorithms
- Database Management System (MySQL)

Version Control

GitHub

PROJECTS

Transport Management System, Node.js, React and MySQL

Built a Transport Management System website to help manage transport database and track routes, vehicles and manage bookings.

- Booking: Manages the bookings done by users (Add/Delete Bookings).
- Vehicle tracking: Gives the information about transport vehicles from the database, shows details such as vehicle type, number and its status.
- Amenities: Displays the amenities for a user's trip based on his booking details.
- Route Details: Shows all the routes of the vehicle mentioned in the transport database.

Guardian Fit, React and TypeScript

Developed an AI-based injury risk and recovery prediction system for athletes to monitor health and optimize performance.

- Calculates injury risk using key parameters such as Heart Rate Variability (HRV), sleep duration, and workout intensity
- Provides personalized recovery recommendations including rest, sleep optimization, and training adjustments

ACHIEVEMENTS

Entrepreneurship Summit (E-Summit) 8.0, Aaruush SRM

01/12/2023

- Pitched a startup idea at the Summit, made it to the Top 10.

Quik Innovate Idea-thon, Quik labs Developer Club (SRM)

Resonate 2.0 Hackathon, Microsoft Student Ambassador Club of SRM

CERTIFICATIONS

Udemy Course on AI for Beginners with Python

Learned basics of machine learning and Python-based data handling.

Udemy Course on Digital Image Processing

Studied image filtering and transformation techniques.

NPTEL Certification Courses

Introduction to OS Introduction to OOP
