

AARYAN PULLAKUDI VEETIL

BTech - Computer Science Engineering (AI & ML)

aaryanharidas23@gmail.com | +91 6362891770 | linkedin.com/in/aaryanpullakudi/ | github.com/aaryanpv23

SUMMARY

Motivated Computer Science student specializing in AI & ML with strong foundations in Python, Java, and Data Structures. Passionate about building practical solutions and exploring AI-driven applications. Seeking internship opportunities to apply technical and problem-solving skills.

LEADERSHIP AND EXPERIENCE

Aaruush SRM, Event Coordinator

2024 – 2025

SRM Institute of Science and Technology

- Worked in the conduction team for E-Summit 9.0 of Aaruush SRM in 2025 as an Event Coordinator, 2 Years of experience working in Aaruush SRM
- Handled cold calling, made 80+ cold calls to Internship, Educational and Career Guidance companies as part of the E-Summit Education Fair along with data entries of 100+ companies with their Person of Contacts (Marketing Manager) by extracting contacts as well as Email IDs via LinkedIn and popular extensions such as Contact Out.
- Contributed as an Event Coordinator by handling the Education Fair on ground that was set up at SRM Institute of Science and Technology and attracted several students to attend the fair.

EDUCATION

BTech in Computer Science Engineering, SRM Institute of Science and Technology

2024 – 2028

Specialization: Artificial Intelligence and Machine Learning CGPA: 8.5

TECHNICAL SKILLS

Programming Languages

Python, Java, MySQL

AI / ML

Artificial Intelligence, Machine Learning Concepts

CS Fundamentals

Data Structures & Algorithms, Database Management System (MySQL)

Version Control

GitHub

CERTIFICATIONS

Udemy Course on AI for Beginners with Python

Learned basics of machine learning and Python-based data handling.

Udemy Course on Digital Image Processing

Studied image filtering and transformation techniques.

NPTEL Certification Courses

Introduction to OS, Introduction to OOP

ACHIEVEMENTS

Entrepreneurship Summit (E-Summit) 8.0, Aaruush SRM

- Pitched a startup idea at the Summit, made it to the Top 10.

Quik Innovate Idea-thon, Quik labs Developer Club (SRM)

Resonate 2.0 Hackathon, Microsoft Student Ambassador Club of SRM

PROJECTS

Smart Study AI Tool, Java, Python

Built a Smart Study AI Tool using Python and Java to help students manage schedules and track academic tasks. Some of its features include:

- Task Manager: Add, delete, and track study tasks through an intuitive user interface.
- Pomodoro Timer: Work in distraction-free intervals using an integrated focus timer.
- Symbolic Math Solver: Solve complex algebraic equations and perform high-precision calculations.
- AI Doubt Solver: Engage with an intelligent chatbot powered by the Google Gemini API for instant academic answers.

Guardian Fit, React and TypeScript

Developed an AI-based injury risk and recovery prediction system for athletes to monitor health and optimize performance. Key Features:

- Calculates injury risk using key parameters such as Heart Rate Variability (HRV), sleep duration, and workout intensity
- Provides personalized recovery recommendations including rest, sleep optimization, and training adjustments
